I design frameworks that turn complex workflows into intuitive product experiences.

Product Designer with **8 years of experience** designing enterprise software and AI-enabled products. I simplify complex workflows through user research, systems thinking, and close collaboration with engineering to help teams ship intuitive products faster. My recent work includes building cross-platform design infrastructure used across 40+ enterprise applications, reducing component creation time by 80%, developer handoff questions by 70%, and support tickets by 40%.

Experience

Product Designer | Intelex Technologies | Remote | Nov 2022 – June 2026

Owned product design across enterprise compliance products and the cross-platform design system, partnering with Product and Engineering to improve user experience across web, iOS, and Android. [Design Systems](#)

- **Simplified Complex User Workflows**
Led end-to-end product design for enterprise compliance workflows from discovery through delivery, reducing task completion time from **80% to 30%** through user research, information architecture, and user journey map redesign.
- **Scaled Product Design Across the Platform**
Defined the company's first cross-platform **Design System**, aligning Product and Engineering around a shared component architecture adopted by **10+ product teams** and **100+ engineers** across **40+ web, iOS, and Android applications**. Delivered component libraries, design tokens, and Storybook documentation that reduced support tickets by **40%**.
- **Accelerated Product Delivery with AI**
Integrated MCP and Claude Code to create a Figma-to-Storybook pipeline, reducing component creation time by **80%** while improving collaboration between Design and Engineering.
- **Improved Cross-Functional Collaboration**
Established governance, documentation, and AI-assisted workflows that reduced developer handoff questions by **70%** while improving delivery quality and release consistency.
- **Unified Enterprise Acquisition**
Rebuilt ACTS, an acquired product, into the Intelex ecosystem using the shared design system, creating a cohesive experience across previously separate products.

UX Designer (Design Consultant) | Acid Integration | Toronto, ON | Aug 2018 – Nov 2022

Early-stage startup consultancy – 0-to-1 product design for ventures with ambiguous requirements and fast-paced environments.

- Led 0-1 end-to-end design for multiple MVPs—from user research and wireframes to prototypes and shipped products
- Reduced iteration cycles by 50%—establishing lightweight research and experimentation frameworks in fast-paced and ambiguous environment
- Partnered cross-functionally—collaborated with founders and engineering teams to define requirements and ship quickly

Education

Master of Architecture // University of Toronto 2016

BFA in Design // Massachusetts College of Art & Design 2011

Tools & Skills

Design: Figma, Miro, Jira, Storybook | Accessibility: WCAG AA

AI: Claude Code & Cowork, Cursor, Figma Make | Front-End: HTML, CSS, React, VS Code, Git
