

I design systems that help product teams move fast without losing consistency — cut component creation time by 80% with AI-assisted workflows for Figma to Storybook pipeline.

Product Designer and Design Systems Lead with 7+ years of experience turning complex enterprise workflows into scalable, revenue-generating products. I bridge strategy and execution—defining AI-driven workflows, building systems adopted across multiple teams, and delivering measurable business impact. Trained as an architect, I bring a systems mindset and a designer's craft to every team I work with.

Core Competencies

- End-to-End Product Design: Discovery, research, prototyping, visual design, QA
- Complex Workflows: Data-heavy applications, regulated environments, multi-persona systems
- Design Systems: Component architecture, token strategies, documentation, adoption
- User Research: Interviews, usability testing, A/B testing, analytics-informed design
- Led adoption of AI-driven design workflows—integrating Claude Code and MCP automation to reduce component creation time by 80% and establish reusable frameworks that accelerated product delivery.
- Strategic leadership: Defined product direction across core compliance products—influencing roadmaps, prioritization, and resource allocation. Build trust with cross-functional partners by balancing user needs, business goals, and engineering constraints.

Professional Experience

Product Designer (Design System) | Intelix Technologies | Remote | Nov 2022 – June 2026

- Enterprise EHS software serving 50+ enterprise clients and thousands of daily users across safety, compliance, and frontline operations.
- **Drove 80% adoption across 10+ product teams**—building a design system from scratch with governance models that reduced component creation time by 80% and cut developer handoff questions by 70%
- **Reduced task completion time by ~35%**—accelerating time-to-compliance for safety professionals and reducing operational risk across 50+ enterprise clients
- **Cut support tickets by ~40%**—saving an estimated 200+ engineering hours annually and enabling teams to focus on new features
- **Defined product direction for core compliance products**—shaping roadmaps, prioritization, and resource allocation while balancing user needs, business goals, and engineering constraints
- **Mentored other designers**—helping them develop systems thinking and strategic growth through regular feedback and design critiques
- **Designed for web and native mobile (iOS/Android)**—maintaining consistency with Material Design and Apple's HIG

UX Designer (Design Consultant) | Acid Integration | Toronto, ON | Aug 2018 – Nov 2022

- **Led 0-1 end-to-end design for multiple MVPs**—from user research and wireframes to prototypes and shipped products
- **Reduced iteration cycles by 50%**—establishing lightweight research and experimentation frameworks in fast-paced and ambiguous environment
- **Partnered cross-functionally**—collaborated with founders and engineering teams to define requirements and ship quickly

Education

Master of Architecture | University of Toronto 2016

BFA in Design | Massachusetts College of Art & Design 2011

Tools & Skills

Design: Figma, Miro, Storybook | AI: Claude Code, Cursor, Figma Make | Front-End: HTML, CSS, React, VS Code, GitHub | Accessibility: WCAG AA
